La metafora modellizzatrice

Orientamento e punto di vista sul concetto

• Non seulement les éléments transférés colorent et structurent le nouveau discours dont ils sont les modèles conceptuels, mais encore, en passant derrière le miroir, ils peuvent changer eux-mêmes dans toutes leurs relations. [...] A travers des schémas transférés qui sont tantôt très connus et en quelque sorte préacceptés, tantôt au contraire peu connus et donc aptes à être investis, un propos nouveau est exposé. Ce propos est plein de repères dans sa formulation – le métaphorique permet, justement, de s'orienter – mais sa teneur, par hypothèse, est inédite. (Schlanger, 1991 : 92-93)
